

Several county bridge projects already completed

Several of Tillamook county's bridge replacement projects have been completed. Bewley Creek Bridge, on Bewley Creek Road at Milepost 1.43, opened to traffic Nov. 16. Killam Creek Bridge, on South Prairie Road at Milepost 2.0, opened to traffic Nov. 23. East Creek Bridge, on Moon Creek Road at Milepost 0.35, was available for public use in early September, as the old bridge was removed next to the new bridge. Josi Bridge is currently under construction. Shown is the contractor work-

ing on one of the bridge abutments. The bridge is scheduled for completion in the spring. The bridge is on Kansas Creek Road, just off SR 6 near Milepost 11. Johnson Bridge, on Long Prairie Road, and Sorenson Bridge, on Blaine Road, are still under design, with construction set for next summer at the earliest.
