BLASER BRIDGE REPLACEMENT PROJECT: START OF WORK AND ROAD CLOSURE

Tillamook County Road Department recently held a project pre-construction meeting with the Blaser Bridge replacement project's prime contractor (D&A General Contractors), their sub-contractors and various local utility companies. During that meeting, the contractor announced their anticipated schedule for the bridge replacement and road closure.

D&A General Contractors will start moving their construction equipment to the project site on Tillamook River Road at Milepost 1.0 during the Week of June 23rd and anticipates starting roadwork the week of June 30th. The contractor may close the bridge as early at Monday, June 30, 2003. Final project coordination is still underway and the above dates may be flexible.

Tillamook River Road at the bridge will be closed for the duration of the project. Weber Road and its intersection with Tillamook River Road will remain open. There may be flagging and delays of traffic at times in order to accommodate construction activities. Prior to the road closure, detour signs will be in-place indicating actual road closure and directing traffic to the detour. Detour traffic during the road closure will be routed to either Gienger Road and/or Tillamook River Road.

Project completion and the road reopening is scheduled for the end of October 2003.

If you have questions or concerns, please call Tillamook County Public Works Department at 503-842-3403.
