COMMISSIONERS' WEEKLY REPORT

January 20, 2006

COUNTY ROAD DAMAGE

The rains and winds of this past month have caused numerous problems on the county's roads. County workers have removed trees, rocks, mud and dirt from roadways, many times at night, week-ends and on holidays. The high water and flooding of the last two weeks has caused plugged culverts, shoulder erosion and an increase in the number of pot holes on the roads through out the County. Landslide areas also become more active during times of heavy rain.

Problems on County roads should be reported to Public Works at 503-842-3419. Public Works will assess the problem, take corrective action or place the corrective action on a priority list for repair when resources and weather permits.
