

Survey to find

QUARTER CORNER BETWEEN SECS. 1 & 2, T2N, R7W, W.M.

Tillamook County, Oregon

Survey by Bert Mason Jr.

October 31, 1956

Oct. 31, 1956 at the vicinity of the $\frac{1}{4}$ corner between secs. 1 & 2, T2N, R7W I find lying on the ground a 6" square white unmarked post and an old 3" square unmarked post.

I find the hemlock BT NE about 80 feet down the hill. The blaze is chopped out and the surface rotted. A Crown-Zellerbach yellow tag and an Oregon State Board of Forestry tag are on the under side of the log. I find the hold from which the tree came. From it I measure 12.0 feet at S 71° W and set a point from which at N 87° W 21 feet I find the stump of a small (14"-16") hemlock with marks showing that an old blaze had been opened. The surface is rotted away.

I set a 1" galv. iron pipe 30" long 15" in the ground marked T2N R7W $\frac{1}{4}$ S2/S1 1956 IS322 from which:

A fir stump 36" diameter bears S $30\frac{1}{2}^{\circ}$ W 23.2 feet marked S2 $\frac{1}{4}$ S BT.
