CORNER VISITS

MONUMENT/ACCESSORY*	LOCATION FROM CORNER	WITNESSES	DATE
<p>At the corner to secs. 8, 9, 16, 17, T2N, R7W, I find a blazed tree agreeing in age, size and direction of blaze with the original notes. The marks have been chopped away. From this tree, I set a point 27 feet at S34 E which falls in the road. Measurements from this point show that the southerly BT's have been graded out and the northeasterly one destroyed in logging. I check the calls to the south and east from this point, and the measurements also check measurements scaled from the plat of 1891, but they do not check the plat of 1893. Since the true corner falls in the travelled way, I set a witness corner 55.1ft. South. For the witness corner I set an unmarked 1½" galv. iron pipe 30" long, 20" in the ground from which:</p> <p>A 42" Hemlock stump mkd. "WCS16T2NBT". A 50" Fir stump mkd. "S17LS322BT" A 39" Fir stump mkd. "WCS81956BT".</p>	<p>S12 E 40.6ft. S47 W 58.0ft. N62 W 45.3ft.</p>	<p>B. Mason Jr.</p>	<p>12/5/56</p>
