3rd Street Update

YES....the 3rd Street Enhancement Project is resuming soon.

The work on 3rd Street is expected to resume this month, weather dependent, with the contractor mobilizing equipment back to the site to complete the remaining work. This work will include grading and paving of driveways and landscaping areas behind sidewalks, pouring concrete for sidewalks and driveways, paving the top lift of asphalt on 3rd Street, side streets, and the appropriate driveway connections, completion of the storm water swale in the school field, and other project close-out work such as general landscaping, signing and striping, and clean-up. The work is anticipated to be completed by mid-summer.

What does this all mean? This means 3rd street will have new sidewalks, street lighting, bike lanes, a new waterline, a storm drainage system and best of all, a new road surface. The project was from Pine Avenue to just east of Marolf Loop. Thank you all for your patience during the winter months as we all had to cope with the obstacle course of the raised manholes.

Agencies' working together is good public policy. The County Public Works Department with a grant from ODOT partnered with Tillamook Urban Renewal Agency and the City of Tillamook to meet our goals of improving the safety of our road system.

The Contractor is required to maintain access to your business and residential driveways until they are specifically working on your driveway. Remember businesses are open.

Please remember to keep the travelling public and road workers safe by following the speed signs in construction zones. For more information call your Road Department at 503-842-3419.

We take pride in serving the public by providing, maintaining, and preserving a safe and efficient county road network, and quickly responding to weather events and hazards with our funding issues. We protect the public's investment by working with our partners and targeting resources to minimize long term costs while providing the best possible service.
