		Set a post (fir), $4\frac{1}{2}$ feet long, 4 inches diameter, for $\frac{1}{4}$ section corner, from which
		A fir, 30" diameter, bears North 67° West, 20 1ks. distance, A fir, 40" diameter, bears South 60° East, 43 1ks. distance.
		FOUND:
		30" snag, North 67° "est, 20 links (as Orig.) with mks. rotted off, 40" snag, South 60° East 43 links (as orig.) with mks. burnt off, From this point to the West 243 feet is an original line blaze on a slab that had fallen off a snag. To the East 136 feet is an original blaze on a pitch slab of a snag, also, an original line blaze on a snag approximately \(\frac{1}{4} \) mile to the east. The corner point is \(\frac{1}{2} \) mile east of the N-S Section Line. With this evidence I set corner.
